How to Install Custom Scenes

Accessing Remixes / Custom Scenes Directly

Steam, Meta Quest 2, and Oculus Rift users are able to view and download Remixes uploaded to Mod.io directly in-headset. Simply head to the “Remixes” Tab in the main menu.*

For manual installation

The process of installing your custom Scenes onto your device is the same across all platforms

- Download the Zip file of the Scene you wish to play
 - Zip files for are on the bottom right hand corner of a Scene's page under "Download Files Manually"
- Move the Zip file for the custom Scene into the following directory on your computer:
\\Users\\Public\\PistolWhip\\Sideloads\\zip
- Launch Pistol Whip
- Wait for custom Scenes to load
- Access your custom Scenes in the Local tab in Remixes

Steam

- Navigate to \\Users\\Public\\PistolWhip\\Sideloads\\zip
- Place your custom Scene here

Meta Quest 2 / Oculus Rift

- Navigate to \\Users\\Public\\PistolWhip\\Sideloads\\zip
- Place your custom Scene here

Still have questions, or experiencing an issue with installation?

Join our official Discord (pistolwhip.gg) to join in on the discussion, ask questions, and get support! You can also submit a ticket for our team at: <https://bit.ly/pistolmixbugform>

**Please note that Remixes/Custom Scenes are not available on PS VR2, PS VR, Meta Quest 1 or Pico at this time.*

so I downloaded about 80 remixes and install it in correct folder
\\Android\\data\\com.cloudheadgames.pistolwhip\\files\\CustomLevels\\zip. However, when I join game and go to Remixes --> Local tab. It only show about 10 remixes (1/1page). Is this a limitation or I am do something wrong.
